

Proven Impact

RCI REACH is an evidence-based program proven in the community setting to improve the caregiver's experience by:

- Reducing caregiver burden scores by 15% (p=.004)
- Improving caregiver self reported health by 10% (p=.023).
- Reducing depression scores by 16% (p=.006).

What are Clients saying about RCI REACH?

"This has helped me in ways that nothing else has been able to help me. I've been to support groups and read informational books, but this has been by far the most helpful."

Family Caregiver, Session 12

RCI REACH

Resources for Enhancing Alzheimer's Caregiver Health

Certified RCI REACH Interventionists provide:

- *Current information on Alzheimer's disease and related dementia.*
- *Strategies for coping with troubling behaviors of their loved ones.*
- *Techniques to offset the impact of stress on their health.*
- *Tools for effectively identifying solutions to their specific challenges.*
- *Encouragement, support, and understanding.*

RCI REACH addresses

- **Emotional wellbeing and Stress management**
- **Problem Solving and Communication skills**
- **Coping with troubling behaviors**
- **Caregiver self—care and health management**
- **Accessing resources and supports.**

Services are tailored to individual caregiver needs and delivered over a six month period during nine home visits and three telephone sessions.
